INTRODUCTION

The DJI Flip is a new feature introduced by DJI, a leader in the drone and camera technology market. DJI Flip is designed to allow users to perform 180-degree flips with their drones, making it a fun and dynamic way to capture exciting aerial shots or simply enjoy a more interactive flying experience.

This feature is available on specific DJI drone models, offering a simple way to initiate flips with a single button press or a custom gesture, depending on the drone's settings and controller options. It enhances the overall fun and versatility of the drone, giving users a creative way to showcase their flying skills and create more visually interesting videos or images. By using advanced stabilization and control technologies, DJI ensures that even during complex maneuvers like flips, the drone maintains smooth flight paths and stability. This allows both beginners and experienced pilots to execute flips safely and with confidence. DJI Flip helps make aerial photography more exciting, adding an element of thrill to the flying experience.

IN THE BOX:-

DJI Flip
× 1

DJI RC 2 Remote Controller
× 1

Intelligent Flight Battery
× 3

Parallel Charging Hub
× 1

DJI Flip Shoulder Bag
× 1

Spare Propellers (Pair)
(Screws Included)
× 3

Type-C to Type-C PD Cable
× 1

Gimbal Protector
× 1

Screwdriver
× 1

The DJI Flip is a compact and innovative drone that combines portability, safety, and high-quality imaging. Weighing less than 249 grams, it offers a user-friendly experience suitable for both beginners and seasoned drone enthusiasts.

DESIGN AND BUILD

- **Unique Folding Mechanism :** The Flip features a distinctive foldable design where each of its four propeller motors folds down beneath the body, stacking on top of each other. This design results in a slim profile reminiscent of a Star Wars AT-AT walker or a penny-farthing bicycle when folded.
- **Integrated Propeller Guards :** Its design includes full-coverage propeller guards made from polycarbonate material, enhancing safety by minimizing the risk of damage to the drone, surroundings, and individuals during flight.

CAMERA AND IMAGING

- **High-Resolution Sensor** : Equipped with a 48-megapixel sensor, the Flip captures sharp images suitable for both photography and videography needs.
- **4K Video Recording** : The drone supports 4K video recording at 60 frames per second, ensuring smooth and high-quality video capture.
- **Three-Axis Gimbal** : A three-axis gimbal stabilizes the camera, delivering steady footage even during dynamic movements or in windy conditions.

FLIGHT PERFORMANCE

- **Extended Transmission Range:** The Flip offers a video transmission range of up to 13 kilometers (approximately 8 miles), allowing for expansive aerial exploration.
- **User-Friendly Controls:** Pilots can operate the Flip using a smartphone, the included RC-N3 remote controller, or even voice commands, providing versatile control options.

SAFETY FEATURES

- **Obstacle Avoidance:** Front-facing sensors assist in collision avoidance, enhancing flight safety, especially in autopilot and subject tracking modes.
- **Palm Takeoff:** The Flip supports palm takeoff, enabling users to launch the drone directly from their hand without the need for a remote controller.
